People Who Work **Indoors With Their Hands**

Seamstresses, watch-makers, artists, draughtsmen, and many others, cannot properly handle their tools with cold, stiff hands. Many a lost hour or two on cold winter mornings results from the delayed heat of furnace or stove.

The Perfection Oil Heater in a few minutes gives the temperature that assures the worker warm hands and pliable muscles. The

quickly gives heat, and with one filling of the font burns steadily for nine hours. without smoke or smell. Has automatic-locking flame spreader which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so the wick can be quickly cleaned.

It has a damper top and a cool handle. Indicator always shows the amount of oil in the font. The filler-cap does not need to be screwed down; it is put in like a cork in a bottle, and is attached to the font by a chain, and cannot get lost. The burner body or gallery cannot become wedged, because of a new device in construction, and consequently, it can always be easily unscrewed in an instant for rewicking. The Perfection is finished in japan or nickel, is strong, durable, well-made, built for service, and yet light and ornamental.

Eureka, Utah. Dec. 21, 3910. Francis G. Luke, Gen. Mgra-Merchants' Protective Association, Salt Lake City, Utah.

Dear Str—
I received the Seven Hundred and Fifty Dollars in settlement of my claim for damages against the mining company, and wish to thank you therefor. You handled this case all right. I was afraid it would go into court and stay there a long time. In making this settlement without suit and so promptly you have done excellently. I will tell my friends and the miners. Some of them may need your services.

Yours truly,

GUS GUSTAFSON.
